Poetry Is A Love Language
(But First, Lemme Tell You Something ...)
Welcome to this work. Within these pages are verses beckoning for social justice, self-love, mental health, a peek into past military life, Black love, and the challenges that accompany one's faith. It was birthed from a journey toward overcoming, triumph, and eventual joy. Victory tastes sweeter when you've nearly choked on adversity - especially when people either stood by and watched, or overtly contributed to your trials. These experiences were a teaching tool—and stepping stone—in learning who I am and knowing I am equipped to help people in areas where I was once found wanting.

SHIP OF THESEUS
What if you could replace every neuron in your brain with an exact duplicate, but instead of a nerve cell made of flesh, it was made of silicon? Every dendrite, every synapse would be replaced with an identically functioning quantum computer. Would "you" still be "YOU"? If not, at what point do you stop being a person and simply a computer that emulates a person?
What if you were a spiritual person while your brain was flesh and blood? Would you still be spiritual after you were turned into a collection of computers? Would you still consider yourself to have a soul?
Ralph Chalmers is killed in an automobile accident and has his brain transcribed to a computer. Ralph faces a number of difficulties from his family and from a society that has not quite caught up with the technological revolution that can eliminate death ... but at a terrible cost.

Another killing leads to a ... and Detective Ian McLarry taps the ... Clann leading to more turns and tw... Vegas, Virginia Beach and beyond. ... contract killer, orchestrates a series of ... business and cleaning up 'loose ends.'
Christmas Love
Unsung Odysseys
Unsung Odysseys explores the story of Odysseus' ten-year journey home from Troy through the multiple voices of the women embroiled in his adventures—a distraught mother, a patient wife, a devoted nurse, a benevolent witch, a possessive nymph, a love-sick princess, and a loyal goddess.
In words expressed with heartfelt clarity that convey timeless messages, these women have finally broken their silence to share their perspectives on an epic hero's adventures.
Tamara Agha-Jaffar is the author of three novels and two books of non-fiction on ancient mythology. She is a retired professor of English and lives in Kansas. You can find her online at www.tamaraaghajaffar.com where she blogs on mythology and writes book reviews.

ALPHABET ON VACATION
Everyone knows the alphabet, but have you stopped to consider how important those letters are? What if the alphabet took a much-needed vacation? That is exactly what happens in this story. Each letter sets off to chase its dreams, but the empty pages that are left behind teach us all an important lesson on the power of words.

IMPORT/EXECUTE
SADIE'S SMILE
Sometimes, Sadie O'Grady missed the cheese shop on main street back east since she moved west. But what she really missed was the purr of a kitten in the evening.
Her husband, Joe O'Grady, notices this, and takes his wagon on an adventure across the prairie back east to collect cats to see Sadie's smile once again.
